

# TURKISH HAZELNUT WEEKLY SHIPMENT REPORT

## Weekly

## Seasonal

Last week was a short week with 1.5 days off due to a holiday in Turkey. Weekly shipments may come due to fewer working days. Seasonally, still export is running around 14-15,000 tons kernel basis over the last season. And this difference can be the same by the end of the crop season, too.

This week, TMO may come to market with new sales of the 2022 crop, the price would not be the same as the last round, and if they put the correct price, they may sell all their stocks of the 2022 crop. They also hold some 2024 crop. Both would total around 50,000 metric tons on an in-shell basis. We will update when they announce it.
