

# TURKISH HAZELNUT WEEKLY SHIPMENT REPORT

## Weekly

## Seasonal

Exports are still running 53% behind last season. In-shell prices have been stable since Ferrero entered the market. As per the agreement, Ferrero will purchase 30,000 metric tons of in-shell nuts until the end of the year. Maybe they will do it in 2 rounds, but with the condition of the current market, we believe they will do it without any delay. We get a lot of inquiries every day but without much orders.

We will report within the week if we get further details from the market.
