

# TURKISH HAZELNUT WEEKLY SHIPMENT REPORT

## Weekly

## Seasonal

Still running at the same export speed. The biggest buyer has already contracted more than 30,000 tons in-shell. Maybe even higher than 40,000 mtons, but we may only know the real number if they announce to the market. Prices for in-shell have remained the same for almost 3 weeks. There is a slight increase in the price of the 13-15mm size. This may be due to more demand before the new year for the snacking markets. Demand is still low, many buyers are coming into the market, but minimal business concluded.
