

TURKISH HAZELNUT WEEKLY SHIPMENT REPORT

Weekly

Seasonal

Last week was short due to Ramadan EID. But, there are tons of social media and internet News posts regarding flower counts. Most of them fully disagree, and some do not even believe that there have been any real counts made. Ofcourse that is not true, counts being made scientifically for sure, but we have to remember that this is only a flower count, not a fruit count. We can all agree that a crop can be good if all goes well until harvesting. Many buyers began analyzing the possible effects of the war. Energy, logistics, fertilizers, etc., all have to be considered.
