

# TURKISH HAZELNUT WEEKLY SHIPMENT REPORT

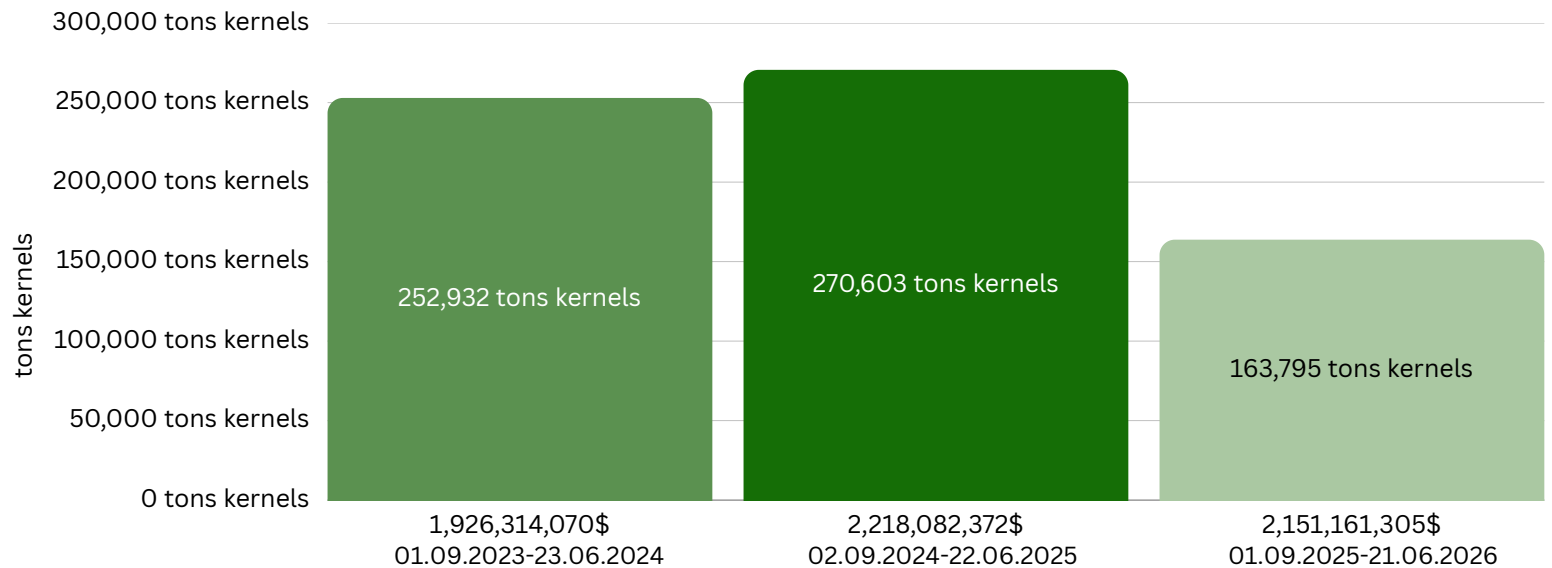

## Weekly

● 2023 Crop Season ● 2024 Crop Season ● 2025 Crop Season

## Seasonal

● 2023 Crop Season ● 2024 Crop Season ● 2025 Crop Season

More business is being booked, as current levels are much better than they have been. We expect the market to be active till to the new crop as we still get many inquiries for fast shipments. New crop objective forecast tours will be starting soon in the 2nd week of July. Both the Ministry of Agriculture and the Exporters Associations. will be announced by the last week of July. We do not expect any surprise, and we also believe current levels are reflecting the 2026 crop expectations. TMO may announce their price by the end of July or the beginning of August. But their buying terms will be more important, as they will show their willingness to buy.
