Shipments are slowing down. More demand for the new crop. Many plants will be closing down shortly to prepare for getting ready to new crop, and also it will be vacation time too. By this week, around Thursday, the objective crop estimate study of the Blacksea Exporters' Association will be concluded. Unofficial estimate of the Ministry of Agriculture is as low as 704,000 mtons in-shell. (Our exporters Assoc last estimate in May was 809,000 mtons) We will announce the latest objective estimate by Thursday this week.
